

# OPEN CABLER REGISTRATION COURSE

## Prepare for ACMA Open Cabler Registration

### ACMA Restricted Rule & ACMA Open Rule

The open cabler course is a great entry point for people wishing to work in the telecommunications industry. This course covers both the ACMA Open Rule and the ACMA Restricted Rule to give students the most updated qualification available.

Upon successful completion of this course, individuals who have three hundred sixty (360) hours of authentic telecommunications cabling experience and meet the course prerequisites, will have constructed the skills and knowledge required to apply for an ACMA Open Cabler Registration.

An Open Cabler Registration enables telecommunications workers to legally install and maintain telephone, security\* and fire alarm cabling in all types of customer premises. This course replaces the old AUSTEL & BCL license courses. Technicians installing data, coaxial or fibre optic cable will also require the appropriate endorsement on their registration.

The following units of competency **MUST** be completed or held prior to commencing your open registration course. \*\*

- **ICTWHS204** – Follow work health and safety and environmental policy & procedures
- **ICTTEN201** – Use electrical skills in telecommunications work

\*Please note that for work in the security industry a separate Security Licence may be required depending on the location (State/Territory) and type of work being conducted.

\*\* Students can complete these online, they are included in the cost of the course, login details to our eLearning will be provided on registration.
