Visit our website www.jbhunter.edu.au to book your place

OUTCOME

ICTTEN208 – Use electrical skills when working with telecommunications networks

ICTWHS204 – Follow work health and safety and environmental policy and procedures

ICTTEN202 – Use hand and power tools

ICTCBL246 – Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule

ICTCBL247 – Install, maintain and modify customer premises communications cabling: ACMA Open Rule

Prepare for ACMA Open Cabler Registration

ACMA Restricted Rule & ACMA Open Rule

The open cabler course is a great entry point for people wishing to work in the telecommunications industry. This course covers both the ACMA Open Rule and the ACMA Restricted Rule to give students the most updated qualification available.

Upon successful completion of this course, individuals who have three hundred sixty (360) hours of authentic telecommunications cabling experience and meet the course prerequisites, will have constructed the skills and knowledge required to apply for an ACMA Open Cabler Registration.

An Open Cabler Registration enables telecommunications workers to legally install and maintain telephone, security* and fire alarm cabling in all types of customer premises. This course replaces the old AUSTEL & BCL license courses. Technicians installing data, coaxial or fibre optic cable will also require the appropriate endorsement on their registration.

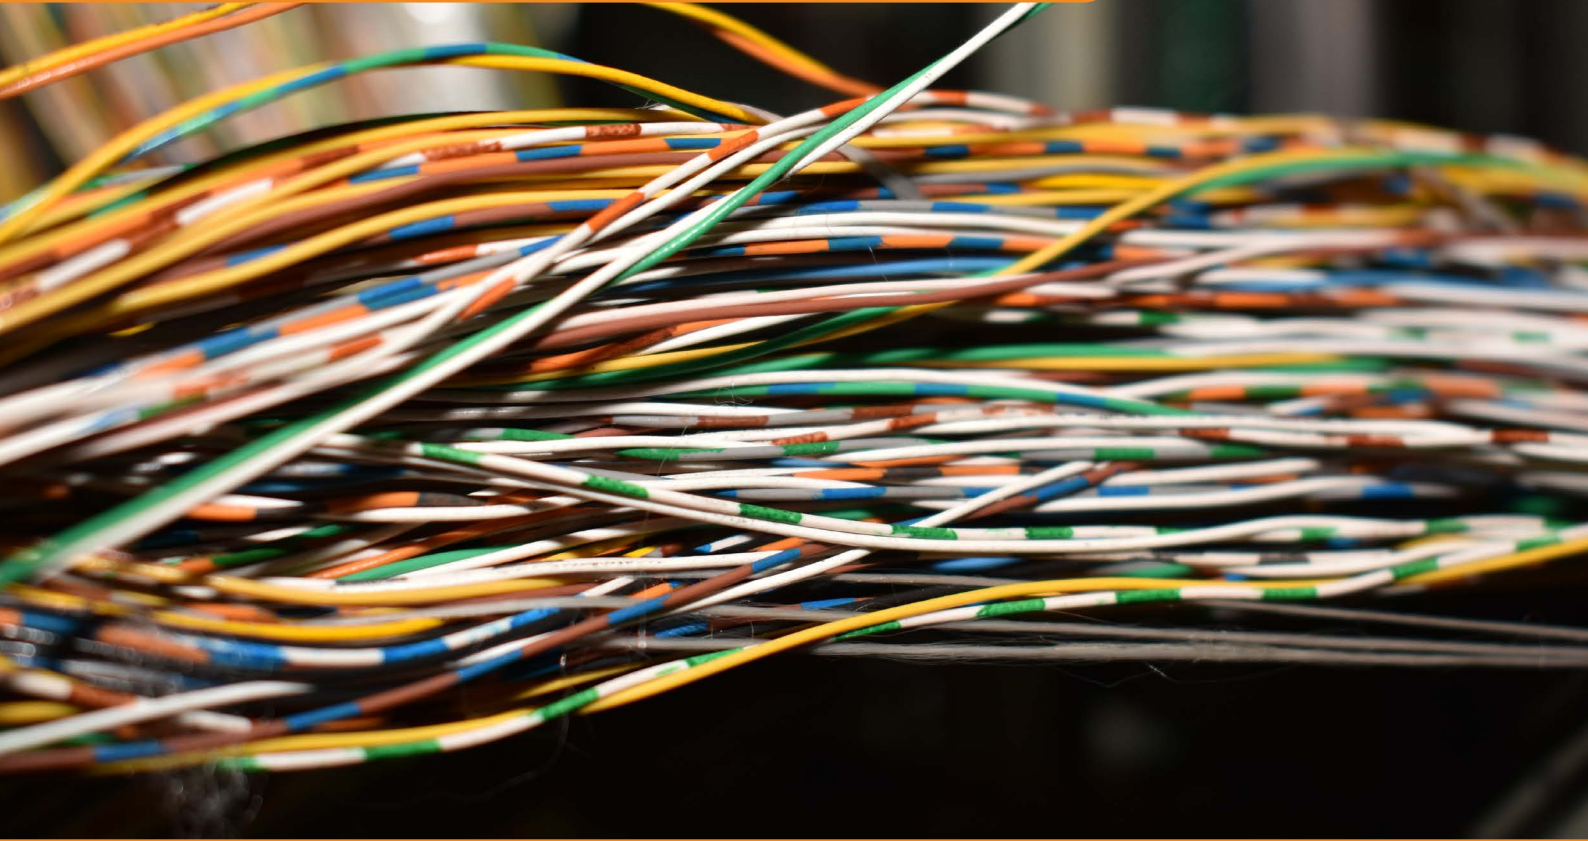

*Please note that for work in the security industry a separate Security Licence may be required depending on the location (State/Territory) and type of work being conducted.
